DETAILED ACTION

1. This Supplemental Office Action is in response to the Telephone Interview dated November 2010 on the cancelled claims which were withdrawn from the Election/Restriction requirement.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. The application has been amended as follows:

Add the following claims:

-- 10. A polymer electrolyte comprising a block copolymer according to claim 1 as an active ingredient.

11. A polymer electrolyte membrane containing a polymer electrolyte according to claim 10.

12. A catalyst composition containing a polymer electrolyte according to claim 10.

13. A fuel cell using a polymer electrolyte membrane according to

claim 11.

14. A fuel cell using a catalyst composition according to claim 12. --

Allowable Subject Matter

4. Claims 1-4 and 10-14 are allowed.

5. The following is an examiner's statement of reasons for allowance:

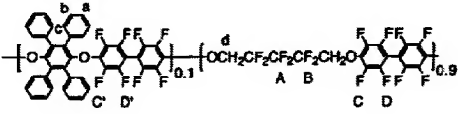

The present claims are allowable over the closest references: Miyatake et al.

[Macromolecules, **34**, 2065-2071 (2001)].

Summary of Claim 1:

A block copolymer characterized in that said block copolymer has	
	at least one block having an acid group and
	at least one block having substantially no acid group,
	<u>one end group of a repeating unit</u> in at least one block of all blocks is oxygen and/or sulfur, and
	at least one repeating unit of a block having substantially no acid group contains a halogen atom.

Miyatake et al. disclose a polymer electrolyte for fuel cells, wherein the polymer electrolyte comprises an aromatic copolymer containing sulfonated tetraphenyl phenylene (hexaphenylbiphenylene), fluorinated alkane, perfluorobiphenylene moieties (col. 1, page 2065; page 2068):

	
one block having an acid group	one block having substantially no acid group
<u>one end group</u> of a repeating unit in at least one block of all blocks is oxygen and/or sulfur	one repeating unit of a block having substantially <u>no acid group</u> containing a halogen atom

However, Miyatake et al. do not teach or fairly suggest the claimed block copolymer, wherein the block copolymer has at least one block having an acid group and at least one block having substantially no acid group, one end group of a repeating unit in at least one block of all blocks is oxygen and/or sulfur, and at least one repeating unit of a block having substantially no acid group contains a halogen atom.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ling-Siu Choi whose telephone number is 571-272-1098. The examiner can normally be reached on Monday to Friday.
